"Our Associates Matter, Everyone Benefits from Diversity & Inclusion, Diverse & Inclusive Teams Drive Growth"

Job Description

We are looking for creative and energetic individuals to join our product development teams. The Application Developer (Associate Programmer Analyst) role is an entry level opportunity for the right candidate to start a fast-paced career track in the development of financial technology solutions. This position will allow the candidate to learn and grow in the financial services industry and in the application development discipline.

As an Application Developer, you will:

• Pioneer desktop, web, and mobile products that will be used industry-wide
• Join a vibrant and inclusive community located in downtown Toronto and Vancouver
• Become a vital part of a small, focused team led by a Development Manager
• Solve complex challenges with novel solutions
• Be given opportunities to interact with clients
• Experience how the financial industry works from an insider’s vantage-point

Broadridge promotes personal and career growth, and life-long learning to help create a rewarding work-environment. Come and experience our world class team.

Responsibilities

• R&D, development, and testing of new products, system enhancements, and defects
• User interface design and API implementation
• Development time estimation & product release note documentation
• Investigation and resolution of critical system problems and real-time production issues
Application Developer (Associate Programmer Analyst)

- Supporting Business Analysts and Quality Assurance professionals

Qualifications
- Degree or diploma in Computer Science, Computer Engineering or related discipline
- Good understanding and working knowledge of relational databases (SQL Server, Oracle, or similar systems)
- Experience with object orientated programming (Java, C#, or similar languages)
- Experience designing and building web-based applications
- Experience with Windows and UNIX
- Excellent analytical and communications skills
- Brokerage or financial industry experience will be considered an asset (not mandatory)
