Applications Developer

Locations: Vancouver, Toronto

Are you looking for a new and unique challenge? Do you have an interest in finance and a passion for technology? Are you a self-motivated individual who would relish the opportunity to work with people from around the globe? Are you interested in blockchain and machine learning? Do you want to work for a world leader in FinTech?

We Have:
- Teams of developers working out of downtown offices in Vancouver and Toronto
- Multiple applications built for Desktop, Web and Mobile devices
- Flexible work arrangements
- Opportunities to work around the globe
- Lots of room for professional growth

You Have:
- Experience in object-oriented programming
- Experience working with relational databases
- The ability to understand and troubleshoot problems and draw valid conclusions
- The motivation to learn and adapt to new challenges and technology
- The people skills required to work with a diverse group of technical and business experts
- An interest in the finance industry

You might also have:
- HTML and front-end development knowledge
- Experience with different front-end web application frameworks (e.g. AngularJS, React, Bootstrap)
- Strong knowledge of the Financial industry
- Cloud skills and cloud architecture know-how
- Prior experience working with NoSQL Databases

How to apply:

Email your CV to vandev.recruit@broadridge.com along with a cover letter and a copy of your transcripts.
