CalendHer Technologies

Position: QA Engineer  
Type: Co-Op (Full-time for 4 months)  
Location: Downtown Vancouver  
Job Year Level: Year 3 or higher

About the Company:

At CalendHer Technologies, we believe meaningful interventions start with rich data-sets that grow by asking intuitive questions. We know that the right questions are different for each user. Our vision is to change the way technology intersects with women’s lives, for it to be highly anticipatory and supportive as women move throughout life’s stages.

Job Description:

We are looking for a detail-oriented candidate who wants to help ship high quality production code. Candidates should be familiar with various testing methodologies and frameworks such as unit testing, regression testing, and integration testing. Candidates should be familiar with Swift. You will work closely with the development team, reviewing requirements and defining test strategies, estimates, as well as plans. You will become the champion of identifying and reporting defects, as well as following through to complete testing cycles.

We are looking for creative, positive and resourceful candidates who are adaptive and eager to learn new technologies. We’re looking for the kind of person keen to grow with our team.

We value trust, adaptability, decision making, learning opportunities and strategic thinking. We are agile, and iterative.

Required Knowledge & Experience:
- Understand application requirements and design features to be able to write and implement test cases
- Familiarity with unit testing, integration testing
- Experience with QA automation frameworks testing Web Apps, Mobile Apps, API’s, using frameworks such as: Selenium, Nightwatch, Xcode UI tests, and Appium
- Knowledge of writing technical documentation/defects and issues
- Git and GitHub
- Swift
Nice to Have Knowledge & Experience:
- Familiarity with Python and shell experience
- Interest in NLP

Please send your cover letter and resume to careers@calendher.co. Thank you for your interest in bettering holistic health for women.
