Systems Developer, Investment Analytics

Connor, Clark & Lunn Financial Group provides investment management services to individuals, advisors, pension plans, institutional investors and foundations. As a multi-boutique asset management firm, Connor, Clark & Lunn Financial Group is uniquely focused on creating the conditions for success for its clients, partners and employees. The firm has offices across Canada and in New York, Chicago, and London, England and through its affiliated investment managers is responsible for the investment of approximately $72 billion in financial assets.

We are looking for a Systems Developer to join our 13 person Vancouver-based Information Systems team. In this role, you’ll work closely with portfolio managers and analysts to:

- Analyze and propose improvements to our investment analytics systems
- Design and develop business application solutions, including enhancing the existing quantitative investment system and developing new modules
- Provide end user support for various investment systems

Our investment analytics platform is built on KDB, R, python, C, Java, .NET, Angular and CPLEX based optimization software.

Candidate Profile

Required Skills:

- Strong interest in developing systems for financial markets
- Undergraduate degree in computer science, computer engineering, or mathematics with a GPA of 75% or better
- Strong communication skills
- Team player
- Quick learner with the demonstrated ability to adapt to new technologies, including developing applications using high performance memory based databases and programming languages

Nice to have but not required:

- Strong academic background in mathematics and statistics
- Exposure to the entire systems development life cycle
- Previous experience developing systems in the financial market
- At least 2 co-op terms with experience developing business application systems
- CFA or equivalent financial designation
