Senior Network Security Analyst

Bring your expertise in IT systems security and project management to this senior level opportunity

Salary $68,530.07 - $78,226.68 annually
Another IS27 Senior Network Security Analyst is available in Victoria apply through REQ 58662.

The Senior Network Security Analyst will build, operate and oversee the security infrastructure of government’s shared network. This role encompasses working with a wide variety of customers and stakeholders to develop meaningful use cases and data to knowledge transformations; assessing business requirements and recommending technology to meet the objectives of Security Operations and Ministry clients; and developing and documenting methodology, techniques, standards and tools required to manage network security infrastructure and services.

Qualifications for this role include:
- Degree, diploma, certification or equivalent combination of education and experience in the computer science or data networking field.
- Preference may be given to applicants with professional designation as a Certified Information Systems Security Professional (CISSP) or Certified Information Security Manager (CISM).
- 5 years’ experience working at a senior technical analyst level in a large network environment.
- Preference may be given to applicants with the following experiences:
  - SIEM technologies
  - UNIX platform administration and scripting
  - Experience with the Hadoop ecosystem or other big data platforms
  - Development experience in Python, Java, or Scala
  - Experience with Firewall, IDS/IPS
  - Windows Directory services
  - IT security architecture or service development
  - IT Network or Security Vendor Certifications
- Experience managing large scale security infrastructure project.
- Preference may be given to applicants with 3 years of project management experience
