Front-End Developer
Vancouver, BC

Aavri creates and manage digital services to exceed the desires, needs, and aspirations of our core customers, within the banking and credit union space across North America.

We are looking for a skilled, passionate frontend developer to join our growing team. We’re a highly skilled organization, obsessed with making excellent digital services. We value people who take the initiative and empower everyone to make a real change in our offering or processes. Working in collaboration with your team, your role is to provide expert knowledge and execution for seamless and timely project delivery.

Play a critical role in the Aavri team, as we guide our clientele through the exciting digital transformation process. We work within the financial services industry across North America. The successful candidate will be an outgoing dynamic individual with a consultant mindset and deep experience developing with the tools we use in an enterprise software development environment. Success will be met for those loving a varied role within a small team and will suit an enthusiastic, hardworking person with attention to detail. The ideal candidate will seek out opportunities to take ownership of development processes to help our clients achieve success.

You will:

- Play a principal role in project aspects relating to front-end implementation of Aavri’s customer engagements
- Be valued for your leadership potential and take the lead by training and mentoring a team of developers and contribute to building their expertise
- Join a team where your voice is heard, and your contributions are recognized and rewarded

What makes you tick:

- You thrive on leaving a lasting impression and take pleasure in bringing home the necessary information to build exceptional client solutions, in collaboration with your team
- You’re a creative with an eye for improvement and are excited by the ever-evolving software landscape
- Although confident, you conduct yourself with humility
Who you are:

- 3+ years of hands-on programming skills with a passion for smart code in enterprise environments
- You have experience working in a consulting and professional services environment in a client-facing position. You’re comfortable in an advisory role.
- Exposure to the financial sector, preferably in banking/fintech, is considered an asset
- You have exceptional written and verbal skills in English
- You’ve successfully integrated client-side applications with numerous web services and have exposure to RESTful web services and RAML specifications.
- You have a strong grasp of Git and have worked with services like Bitbucket, Team Foundation Server and Bitbucket
- You practice both TDD and BDD, and take ownership of code quality
- You have extensive experience with the theory and practice of Agile software development. You’ve worked as a developer in a high-performing Scrum team sharing best practices with others.
- You have a valid passport and are excited to work onsite with clients internationally
- You have authorization to work in Canada for any employer

What you will be doing:

- Building world-class digital experiences with Angular, Typescript, SASS and Bootstrap
- Providing in-depth knowledge and direction in: Javascript, CSS, and HTML
- Writing solid tests with Karma/Jasmine and Protractor.
- Consulting with customers and partners to achieve success, balancing the needs of users and clients throughout
- Inspiring co-workers and sharing knowledge and skills with the team, recognizing potential in technology and trends for the financial services industry
- Delivering projects together with clients and partners both remotely and at their locations

Why Aavri:

- Attractive compensation package, depending on experience level also a project-based bonus
- Comprehensive Medical / Dental benefits package
- 3 weeks vacation and 5 Personal Days and flexible work schedule options
- A management team that is built upon the beliefs of equal opportunity, active listening and fostering career growth and skills development

At Aavri we believe in creativity, collaboration, and respect. If you would like to join a company with lots of momentum and a highly skilled executive team who cares, apply now!
