Senior Android Developer – Vancouver BC

Aavri creates and manages digital services for financial institutions across North America. These solutions are inspired by the desires, needs, and aspirations of customers that make our client's organizations work successfully. We integrate and extend industry leading digital banking technology products to help our banking and financial services industry clients reduce their time to market and deliver improved user experiences to their customers.

We’re growing fast and looking for an inspiring Senior Android Developer to join our team. We’re a highly proficient team who are obsessed with making excellent digital services. We value people who take the initiative and empower everyone to make a real change in our offering or processes. Working in collaboration with your team, your role is to provide expert knowledge and execution for seamless and timely project delivery.

Given your close ties to our clientele, it is critical that you gather insights and communicate valuable information to the team, improving overall client experience and service quality. Also, the ideal candidate will look out for innovative new features and potential new products driven by customer demand. You will:

- Play a principal role in project aspects relating to front-end implementation of Aavri’s customer engagements
- Be valued for your leadership potential and take the lead by training and mentoring a team of developers and contribute to building their expertise
- Join a team where your voice is heard, and your contributions are recognized and rewarded

What makes you tick:

- You build beautiful code, conduct tests, and take ownership for your work and have deep commitment to your clientele (in their pursuit for digital excellence)
- You thrive on leaving a lasting impression and take pleasure in bringing home the necessary information to build exceptional client solutions, in collaboration with your team
- You’re a creative with an eye for improvement and are excited by the ever-evolving software landscape
- Highly skilled in adapting Android user interfaces to look great on a variety of devices and screen sizes
- You’re a self-starter and can seek solutions independently; we love a person that is proactive and pragmatic

Who you are and what you’ll be doing:

- Expertise unit testing with JUnit and the Android Test Framework
- Natural in a scrum team, using lean and Agile methodologies
- The ideal fit will be a strong listener and will think before they speak
- 5+ years of Android we need them to be strong in Java (5+ years), exposure to Kotlin is a plus but not required
- Put simply, you are responsible for implementing and maintaining native mobile apps, components and tools – to exceed the expectations of our clientele
- Need to be familiar with Android User Interface Guidelines
- You possess a natural detail orientation and will dedicate your time to: testing, reviewing code quality, reviewing other’s work and creating documentation for such work
• Thorough understanding of best practices programming apps for the Android OS, including permissions management, application lifecycle, effective use of limited resources on mobile devices, and mobile application security
• Experimentation is encouraged; new innovations are part of your daydream and sharing product ideas are part of the job description
• Occasionally you will be asked to engage in Proof of Concepts (POC)
• You will be an excellent code reader and can analyze quickly
• Experience utilizing common Android libraries like Retrofit, Glide, Butterknife and Dagger
• Familiarity with design patterns commonly used in Android applications such as MVP and MVVM

You have strong knowledge of:

• OO design and development, data structures and algorithms
• Multi-threading and memory management, specific to mobile devices
• Experience building reusable mobile app architecture for fetching, caching and working with serialized data
• TDD, unit testing, continuous integration or Jenkins or similar

Why Aavri:

• Attractive compensation package plus project-based bonus
• Comprehensive Medical / Dental benefits package
• 3 weeks’ vacation with flexible work schedule options
• 5 Personal days to care for what matters most, family
• A management team that is built upon the beliefs of equal opportunity, active listening and fostering career growth and skills development

At Aavri we believe in creativity, collaboration, and respect. If you would like to join a company with lots of momentum and a highly skilled executive team who cares, please apply.
