

## Job Post for Software Developer

### What we do

SpeechAce is a leading provider of speech recognition technology to language learners. We developed the world's first speech recognition API that assesses speaking skills and identifies areas of improvement and have since expanded our offerings to include speech transcription and assessment of higher-level skills like vocabulary, grammar, fluency, coherence, and relevance. With a diverse worldwide customer base that includes startups and major language learning providers, SpeechAce is dedicated to helping language learners improve their speaking abilities.

### Who we are

We are a close knit team of marketers, developers, linguists and designers working as a distributed team across several geos. We are passionate about the language learning use case and are fascinated by the opportunities it provides for application of technology. We work in a highly collaborative environment wherein everyone does their part without being micro-managed and then shares the rewards of our labor. We are self-aware, self-motivated and bring our personal and technical best to everything we build.

### Role Description

This is a full-time remote role for a Software Developer position for our fastest growing web product. You will be responsible for a range of tasks including systems design and architecture development, back-end/front-end web development, unit testing and leading and mentoring junior developers. Our software stack primarily comprises of React and Django so having some experience in Javascript and Python will be handy.

### Qualifications

- Bachelor's degree in Computer Science or a related field. Master's preferred.
- Strong foundation in data structures, algorithms and system design.
- Ability and interest in articulating systems design via documentation.
- Experience in developing scalable, secure web services.
- Experience in front-end/back-end web development preferably on a React/Django stack.
- Strong interest in battle testing code with unit tests.
- Experience working in a remote environment with strong communication and collaboration abilities

### Salary Range

\$120,000-\$150,000 CAD
