CLAUSE
TECHNOLOGY

Employer: Clause Technology

Location: Onsite in Vancouver, BC

Experience: 3-5 years working as a Product Manager

Job Type: Full Time Permanent

About Clause Technology

Clause Technology is a software engineering and automation firm, specializing in optimizing business workflows. Clause provides technological solutions and services through joint research and development with collaborators in both industry and academia; our technical team develops software solutions with domain experts from various industries.

Technical Product Manager Job Description

Clause Technology is seeking a Technical Product Manager to join our team in developing automation softwares, and coordinating engagements with our partners in both industry and academia. In this role, you will oversee technical projects, ensuring they align with company strategies and meet market needs. Your responsibilities will include coordinating with multidisciplinary teams, managing project lifecycles, and implementing effective communication and collaboration practices.

Responsibilities

Technical Product Strategy
- Lead the end-to-end development lifecycle of software products, ensuring alignment with market needs and company strategy.
- Define product roadmaps and coordinate development teams using "Agile frameworks".
- Oversee backlog prioritization, feature development, and sprint planning in collaboration with engineering teams.
- Identify and drive product enhancements, using data-driven insights to improve performance.
- Lead client-facing communications to translate user needs to viable technical features.

Strategic Partnerships & Industry Engagement
- Conduct market and competitive analysis to identify industry trends and inform strategic

product direction.
● Act as the primary liaison between Clause Technology, and industry and academic partners to facilitate technical development.

Project Coordination & Sprint Management
● Coordinate sprint planning, defining both long term and short term product development.
● Define sprint documentation standards and protocols.
● Ensure effective communication between engineering, UX, and business teams to optimize project workflows.
● Monitor development deliverables, performance metrics, and technical debt.

Skills & Qualifications

● Bachelor's degree (or equivalent) in Computer Science, Business Administration, or related field.
● 3–5 years of experience in Product Management, ideally in AI, data-driven software, or automation technologies.
● Proficiency in "Agile frameworks", backlog management, and product roadmapping.
● Proven ability to scope and evaluate technical viability of features and infrastructure.
● Effective communication with both technical and non-technical stakeholders.
● Prior experience in a startup environment preferred.
● Professional fluency in English for both written and verbal communication.

Application Submission

If you are passionate about our mission and want to be part of a dynamic team, we would love to hear from you. Please submit your resume outlining your qualifications and experience to careers@clause.tech

Clause Technology is an equal opportunity employer and welcomes applications from all qualified individuals. We thank all applicants for their interest, however, only those selected for an interview will be contacted.
